Applicants' Request for Reconsideration, filed on March 13, 2008, has been carefully considered. Claims 1-28 remain pending in this application.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Applicants' Priority Document was filed on July 11, 2005.

Withdrawn Rejection

The 103(a) rejection of claims 1-28 as being unpatentable over Uhara et al. (U. S. Patent Application Publication No. 2003/0162997, now U. S. Patent No. 7,253,309), stated in the Final Rejection, has been withdrawn in view of Applicants' filing, on March 13, 2008, of a certified English translation of their foreign priority document.

Allowable Subject Matter

2. Claims 1-28 allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest the claimed method of preserving a catalyst, wherein said catalyst is maintained in a reactor under a condition

of a water content of 30 mg or less per 1 gram of catalyst dry weight, before the start of the reaction, or during the stop of the reaction.

Uhara et al. (U. S. Patent Application Publication No. 2003/0162997, now U. S. Patent No. 7,253,309), discloses a method for the production of methacrylic acid, said method comprising introducing a preheated gas into catalyst-packed reactors, so as to retain the relative humidity of the catalyst beds in the range of not more than 40%, and elevating the temperature of said reactors, thereby preventing the catalyst from absorbing moisture.

However, in view of Applicants' filing of a certified English translation of their foreign priority document, Uhara et al. is now disqualified as prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
